## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a disposable absorbent article having elasticized leg cuffs, classified in class 604, subclass 385.27.
- II. Claims 5-8, drawn to a process for placement of elastic members associated with leg-holes on a disposable absorbent article, classified in class 156, subclass 161.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article can be produced by another materially different process such as elasticizing the longitudinal sides of the absorbent core.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Michael Gzybowski on February 22, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-4. Claims 5-8 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 3761

This application is in condition for allowance except for the presence of claims 5-8 to an invention non-elected without traverse. Accordingly, claims 5-8 have been cancelled.

***Allowable Subject Matter***

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

A thorough search of the prior art fails to disclose any reference or references, which, taken alone or in combination, teach or suggest, in combination with the other limitations, a plurality of elastic members associated with the leg-holes being converged substantially into respective single bundles along first elastic zones each extending over a given length of the crotch region in the longitudinal direction and being spaced one from another along second and third elastic zones extending from the first elastic zone along respective side edges of the front and rear waist regions over a given length.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Art Unit: 3761

Authorization for this examiner's amendment was given in a telephone interview with Michael Gzybowski on February 22, 2005.

The application has been amended as follows:

Claims 5-8 are cancelled.
